

Key facts about residents of Arizona District 1¹

Medicaid plays a critical role in people's lives. Nearly 100,000 District residents rely on Medicaid for health care and protection against unaffordable medical bills. They include 33,000 children and almost 15,000 adults age 65 and older.²

Many people with incomes too high for Medicaid buy their own health insurance on healthcare.gov. 34,000 District residents use premium tax credits to purchase coverage. If Congress lets enhanced premium tax credits expire after 2025, these residents' health care costs will rise by 63%, on average, but many people will get hit with much larger spikes. For example:

- A 40-year-old man earning \$31,000 a year would see his monthly premiums more than double, rising from \$58 to \$153. His annual health insurance costs would thus shoot up by \$1,140.
- Health insurance costs would more than triple for a 60-year-old couple earning \$82,000, rising from \$581 to \$1,943 a month. The couple's annual premium costs would go up by \$16,000.

Almost 20,000 District families use the Supplemental Nutrition Assistance Program (SNAP) to help pay their grocery bills. These families include:³

- **Children.** Almost 8,000 of the District's SNAP families, or more than two-fifths, have children.
- **Older adults.** A third of the District's SNAP families include one or more adults age 60 or older.
- **People with disabilities.** More than two in five District families participating in SNAP include at least one person with disabilities.
- **Low-wage workers.** More than nine in ten of the District's SNAP families have bread-earners who work but do not make enough money to feed their families without help.⁴

¹ By Rocio Perez, Policy Analyst and Stan Dorn, Director of Health Policy at UnidosUS.

² The exact figures, according to the Census Bureau, were 97,979 District residents who were covered through Medicaid in 2023, including 32,973 children and 13,980 older adults.

³ These proportions add up to more than 100%, because a single family can have members in multiple categories. For example, a SNAP family with a disabled father, a low-wage, working mother, and a child would count as a family with a child, a family that includes a person with disabilities, and a low-wage worker.

⁴ The exact figures, according to the U.S. Department of Agriculture, were 18,708 District families who used SNAP to help pay food costs, including 7,786 families with children, 6,266 families with at least one adult age 60 or older, 7,818 families with at least one person with disabilities, and 17,500 families with one or more workers.
